## IMMEDIATE SETTLEMENT

Outlook Bright For the Adjustment of the Great Strike in London.

## TEAMSTERS CAN GO TO WORK

Their Trouble is Settled but all Will Remain Out For the Present.

Government Officials Have to Ask Favors of Strike Leader Ben Fillet.

Trade Dead in Liverpool and Strikers in Control—Stopped Coaling of a Ship.

By United Press Wire.

London, Aug. 11.—The outlook for an immediate settlement of the strike which has paralyzed all traffic and freight trade here for the last forty-eight hours, was bright today. The employing federation announced that they had accepted the agreement with the teamsters and that the men can go right back to work. It is also expected that the troubles of the lightermen will be settled almost immediately. In view of the favorable outlook the monster parade, planned for this afternoon as a protest against the using of the troops to break the strike was expected to be abandoned.

The strike situation was somewhat clarified by a tentative agreement with the teamsters, brought about through the board of trade. All the strikers will remain out, however, until the demands of the lightermen are met. The war office, in anticipation of a complete settlement during the day, suspended the order for further troops from Aldershot but 10,000 men were under arms and enroute ready to be rushed to London upon a moment's notice. Street traffic was still paralyzed and the city was only slightly relieved of the pressing need of food supplies. The price of ice has trebled and with the intense heat a serious situation prevails in scores of hospitals. The families of strikers are in dire distress, tens of thousands being reported on the verge of starvation. Pawn shops are refusing further loans because their shelves are overcrowded.

Owing to the shortage of forage the postmaster general was compelled to ask Strike Leader Ben Fillet for an agreement permitting the transportation of forage for the cavalry horses. It was promptly granted. The shadow of famine and commercial ruin is the force bringing an end to the strike. The board of trade conciliation committee held an all night session with the leaders of the teamsters and car men. The committee will next take up the demands of the stevedores, porters and engineers. The employers' federation is being forced to accept the agreements drawn up by the board of trade. Virtually the committee is acting for the employers who are in the position of having or taking the responsibility for distress and misery.

The strike is affecting every industry and today operations at the government mint were discontinued because the Rothschilds could not secure vehicles to convey bullion.

One of the largest cargoes of California fruit ever brought across the Atlantic is rotting in the bottom of the liner Minnehaha at anchor in the Thames.

Strikers Controlled Liverpool. Liverpool, Aug. 11.—Two squadrons of Scotts Greys have arrived from York to assist in maintaining order. The strike situation here is more critical today. Trade is dead and during the night strikers controlled the city. Clashes with the police were frequent. The police reinforced by soldiers finally drove the mob which hurled stones into their ranks, into the side streets and some provisions and other goods were hauled to the shops. The strikers continued to gather and soon regained control. Strikers stopped the coaling of the White Star liner Teutonic and officers of the line admit the vessel will be unable to leave port. Reports from Hull and Manchester say that the strikers have succeeded in tying up all transportation there.

## MAN OF MYSTERY INVESTIGATED

Notations Found in a Book Not Believed to Belong in Cincinnati.

Cincinnati, Aug. 11.—Efforts were resumed Friday by the coroner's office to establish the identity of a "man of mystery" who ended his life between Wednesday morning and late Thursday at the Rand hotel by taking carbolic acid. The man had registered at the hotel as "D. W. Smith," Wednesday. The body was found late Thursday. Various identification marks had been removed from the man's clothing while notations in a book were either erased or scratched

out. The suicide was about forty-five years old, weighed 175 pounds, had brown hair tinged with gray, was slightly bald, had a dark mustache, upper teeth false.

The man wore a blue serge coat, black trousers, blue shirt, slouch hat, which had been bought in Indianapolis. The coat was made by the Royal Tailors, New York, and the shoes were of Raiston make.

A name apparently that of Daniel Warful of Wanful was found on one page while on another was that of Magdalena Kintzel, or Kintzelbaum. Efforts had been made to erase both names.

It is not believed the man lived in Cincinnati.

## POPE'S HEALTH DISQUIETING

Injecting of Caffeine Indicate Almost a Condition of Alarm.

By United Press Wire.

Rome, Aug. 11.—Pope Pius X was afternoon at her home on Gurley avenue from the Vatican. His heart was stronger as a result of hypodermic injections of caffeine, but his condition showed little sign of improvement generally.

Following the operation on his knee, his holiness suffered less pain today. The change from his small bed chamber on the fourth floor to a vast airy room on the floor below, seemed very beneficial. The Pope fears draughts and has added somewhat to his discomfort by insisting that the windows of his room be kept closed even during the present excessively hot weather, believing that any air would make his "rheumatism" worse.

The necessity for the injection of caffeine indicates the general weakness of the Pope, which now is the most disquieting symptom.

## ONE MAN KILLED ANOTHER HURT

By an Explosion in Shaft Number Six, Cornwall, New York.

By United Press Wire.

Cornwall, N. Y., Aug. 11.—One man is supposed to have been killed, another was fatally hurt and enormous damage was done when eleven hundred pounds of blasting powder exploded early today in shaft number six of the New York aqueduct improvement, more than a mile from this village. The shock following the explosion was so great that hundreds of windows in this village were shaken and many of the sleeping inhabitants were thrown from their beds.

Believing for a time that an earthquake had taken place, the citizens of Cornwall rushed into the streets in their night clothing.

Many women fainted and the entire population of the village was badly scared.

## HERALD OF LOUISVILLE

Burned Out Today by Bad Fire—Plant Wrecked.

By United Press Wire.

Louisville, Ky., Aug. 11.—Fire broke out early this morning in the building of the Louisville Herald, Market, between Fourth and Fifth streets, and completely gutted it. The loss is \$100,000. Adjoining buildings were damaged. Following three other big fires, the police believe a firebug is at work.

The Herald lost the entire mechanical plant, including two presses and thirteen linotypes. The fire broke out on the fourth floor in an unused part of the building. John Shafer, owner of the Chicago Post and the Star League of Indiana, owns the Herald.

1184 Extra Books. Columbus, O., Aug. 11.—State examiners, instead of finding any state library books missing, discovered 1,184 more on hand than is accounted for in the library's records.

The examination is incidental to the turning over of all property of the library to John Henry Newman, who recently succeeded C. B. Galbraith as state librarian.

The state library according to the examiners' reports, contains 150,337 volumes, although the records show only 149,653.

There are 324 index cards for which no books could be found, and on the other hand, a small number of books that are not indexed. Of the total number of books 87,321 are in the circulating library and 63,216 in the traveling library. Attention is called to the fact that the state, in 1870, authorized the purchase of the letters and papers of Governor Sinclair, governor of the Northwest Territory, but that some of the letters are now missing.

## THE CHARGES AGAINST WILEY

Framed up by McCabe Show That the Latter was Not on the Square.

## DR. L. F. KEBLER TALKS

McCabe Said the Verdict Against Dr. Wiley Was Affirmed by Wickersham.

Dunlap and McCabe Disagreed With Wiley and Hampered His Work.

Dr. Bigelow Testified Others Employed in the Same Way as Dr. Rusby Was Employed by Dr. Wiley.

By United Press Wire.

## THE WILEY IMBROGLIO.

Dr. Harvey W. Wiley, government chief chemist, charged with "irregularities." Departmental committee felt he should be "permitted to resign."

Attorney General Wickersham affirmed decision declaring Wiley "merited condign punishment." President now considering the matter.

House committee investigating. Wiley supporters charge conspiracy against chemist by other members of pure food board.

Protest obtained they sought to discredit Wiley's attitude on beverage of soda.

Solicitor McCabe admitted approving employment of expert under conditions exactly similar to those for which he found Wiley guilty of "irregularity."

Washington, Aug. 11.—That there was absolutely no difference between the employment of Dr. H. H. Rusby, for which Dr. Harvey W. Wiley was charged with violation of the law, and the employment of members of the Rensen pure food referee board, sanctioned by the administration, was the opinion expressed today by Dr. L. F. Kebler, of chemistry, the main witness today before the house committee on expenditures in the agricultural department.

Kebler threw light on Solicitor McCabe's attitude toward Wiley. "McCabe is frank and does not mince words," he said. "I recall one case which shows how arrogant and domineering he is. Dr. Wiley came to see the district attorney here and told him in a pure food case, I did so. When McCabe heard of it, he telephoned me an unmerciful call down because I saw the district attorney without his permission. I told him I knew of no such order which would justify me in refusing to carry out an order from my chief. He finally threatened to report me to the secretary."

"Do you mean to say you can not aid a district attorney in prosecuting violations of law?" asked Representative Floyd.

"Yes," answered Kebler, "and under a general departmental order we can not talk to or give information even to members of congress."

Washington, Aug. 11.—That the house committee on expenditures in the agricultural department has unearthed a conspiracy to dislodge Dr. Harvey W. Wiley, the government's chief chemist, was the claim made by supporters of the pure food champion today.

The committee has learned that in charge of violating statutory regulations in the employment of Dr. H. H. Rusby, an expert, on an annual salary for per diem work, was originally formulated by Wiley's assistant, and fellow members of the pure food board, Dr. H. E. Dunlap, and submitted to Secretary Wilson without giving the chief chemist an opportunity to defend himself. Wiley was later condemned by the committee of personnel, of which Solicitor McCabe another of the food board was a member, and saw that the verdict was affirmed by Attorney General Wickersham, who held that Wiley should "be permitted to resign."

It was learned that Wiley, McCabe and Dunlap formed the pure food board, and testimony was given that McCabe and Dunlap, who disagreed with Wiley on many questions, had hampered the chief chemist's work.

When the committee met today it was testified that Dr. Wiley himself would testify. It was predicted that the chief chemist would prefer sensational charges.

Dr. W. D. Bigelow, assistant chief of the bureau of chemistry, also under charges with Wiley for Rusby's employment, testified that a number of other experts were employed in exactly the same manner in which Wiley employed Rusby.

Big Bill Moving Back. New York, Aug. 11.—Big Bill Devaney, known as the best chief of police New York ever had, is moving back into the city from Rocketway, because he "can't stand the quietude" after thirty years in Eighty-second street.

DR. CHAS. F. STOKES, U. S. N. Chief of the Bureau of Medicine and Surgery.

## Mandamus Proceedings Started.

Columbus, O., Aug. 11.—Mandamus proceedings were started in the supreme court today by Charles H. Winch and J. R. Lindemuth to compel the state board of assessors and appraisers to reinstate them as members of the Dayton board of review.

The state board, on March 24, of this year, ousted them and three days later they were ejected from their quarters in the Montgomery county courthouse, and Dennis Madden and James A. Smith appointed and installed in their places.

Winch and Lindemuth were ousted on the grounds of neglect of duty but no formal charges were filed against them and neither were they accorded a trial.

On the grounds that they were entitled to a trial Winch and Lindemuth say the action of the state board in ousting them was illegal.

## MRS. NELSON WAS KILLED

She Was the Mother of Battling Nelson, the Pugilist.

By United Press Wire.

Burnham, Ill., Aug. 11.—The mangled body of Mrs. Ida Nelson, mother of "Battling" Nelson, the prize fighter, who was killed yesterday by a train, will be held here until her son returns from the Pacific coast. Messages received here today declare that, throwing all his other plans to the winds, Nelson is speeding east to attend the funeral of the mother he loved so dearly. No funeral arrangements will be made until Battling's return.

Mrs. Nelson, who had been shopping in Hammond, Indiana, stepped from one train here last night in front of another and was killed. Her body was taken to the rich farm her son gave her, purchased with some of his first winnings in the prize ring.

Long before he became champion, Battling's warmest advocate was his mother, who, though opposed to fighting, placed an obstacle in her son's way. In every one of his fights, it is said, Nelson received "final instructions" from his mother before entering the ring. He always had a long distance view set up to Burnham from whatever point he was fighting, so his mother might receive hurried returns.

## TWENTY-NINE PER CENTUM

Is the Conference Agreement on Raw Wool. Whole Matter to be Adjusted.

By United Press Wire.

Washington, Aug. 11.—The full conference committee of the house and senate on the wool tariff revision bill, today adopted twenty-nine per cent on the duty on raw wool. The house bill proposed twenty per cent on raw wool; the La Follette substitute, adopted by the coalition of Republican progressives, and Democrats in the senate, fixed the duty at thirty-five per cent.

A ratio of twenty-nine per cent ad valorem was also agreed to by the committee on oils, tallow, shoddy, woolen rags and all other woolen waste of which wool is the component material of chief value.

Not all the differences have yet been adjusted in the two bills, but Underwood asserted that the whole matter would probably be disposed of this afternoon.

J. Pierpont Morgan has offered \$1,000,000 for the relics of an ancient throne in Austria.

## GREAT OUTPUT OF KING COTTON

Optimistic Reports Being Received Throughout the South.

TEXAS, FIVE MILLION BALES

An Experimental Farm to be Located Near Houston.

Abner Davis Thinks the Texas Ball League is a Joke.

Texas League a Class B Organization. Davis and His Troubles Aired.

By United Press Wire.

Houston, Texas, Aug. 11.—Ranking well with the record of breaking the world's record in early production of the first bale of new crop cotton this year the American cotton belt promises to follow this up with one of the greatest annual outputs ever produced.

Throughout the entire south encouraging and optimistic reports are being received. The weather for the crop has been good, rains have been well distributed and the pests have appeared in greatly diminished numbers. Gins and compresses are preparing for a rush season when it is at its height and every facility is being marshaled for the quick movement of the staple when it is rushed from the field to market.

In Texas the estimates for the production of the state range around the 5,000,000 mark, 25 per cent more than last year. Picking is well under way, especially throughout the South Texas coastal belt and the heavy volume of the production is the basis for the estimates for a record crop in Texas.

In Houston where this great crop will be concentrated and distributed to the sea preparations are being made for the handling of a great crop. It is expected the ship channel alone will carry in excess of 2,000,000 bales. New compresses are being erected and New warehouses are rising near the water terminals so as to facilitate rapid handling of the crop. Every cotton firm in Houston is making strenuous efforts to enlarge its capacity, while several foreign cotton factors have opened headquarters in Houston to be near the seat of production and secure early routing of the staple abroad.

In the face of increased cotton, estimates over the state the additional acreage is given as comparatively small, good weather conditions being given as the cause of increased production.

Houston, Tex., Aug. 11.—To aid the farmer in the scientific department of agriculture an experimental farm, to be established by the county, is to be located near Houston. About 160 acres will be secured for the farm and a practical and scientific demonstration will be placed in charge.

On this farm everything grown in Texas will be handled. New farming theories will be tried practically and an analysis of the result carefully preserved. The cost of production will be inquired into so that the exact profit possible on any crop may be determined.

The activities of the director of the farm will not be confined alone to the tract. He will be obliged to go to any part of the county at the request of a farmer and aid him in combining scientific with practical knowledge. The farm itself will be open to all and the quickest and cheapest methods possible for securing the best results in farming will

be exploited. Houston, Tex., Aug. 11.—An incident perhaps without parallel in organized baseball has occurred in the Texas league, which it brought to the supreme court of minor league baseball—the National Association—may result in some sensational disclosures. Oklahoma City is the town that is causing the trouble and the recent action of Abner Davis, the owner of that franchise, in refusing to allow his men to play a scheduled game in Houston may mean the opening of a battle unique in the annals of organized baseball.

Davis is frank in his opinions—one of which is that the Texas league is a joke. He declares he is not enjoying the same privileges accorded the seven other clubs, especially in that he is compelled to pay a \$100 guarantee to the seven other clubs \$50. He also declares he has invested nearly \$20,000 in the franchise and at present is about \$8,000 on the bad on the venture. This deficit, he believes, the league should make good, as he conceives the opinion that a baseball league is but a partnership and profits and losses should be divided accordingly.

Before the recent fiasco in Houston Davis marshalled his players and agreed on a plan of action. When the time was called for the game the team refused to leave their bench. The game was then forfeited to Houston but before the umpire could demand an exhibition game the Indians had vanished. In consequence 3000 fans filed back and got their money.

By this action Davis has laid himself liable to a \$300 fine and even forfeiture of his franchise. He says he courts a suit and in that case he says he will show up Texas league politics and incidentally he may score some point that will be interesting to organized baseball, which it is admitted is autocratic from the magnates' standpoint.

The Texas league is a class B organization and Oklahoma City is the only club outside the state. Because of the long jump there the league demands a \$100 guarantee, but Davis contract according him the same privileges enjoyed by the other clubs. He has steadfastly refused to pay in excess of \$50 as a guarantee and has invited a suit on that point. These refused to materialize, and evidently he intends forcing an issue which will be fought out in civil courts instead of the supreme tribunal of minor league baseball.

## Paid for Her Fling.

Cleveland, Aug. 11.—Mary Setze, pretty confidential bookkeeper of Attorney T. H. Johnson, sent to the Ohio penitentiary in 1902 for five years for forging her employer's name to checks to the amount of \$3,200 and who, when arrested, said she had had her "fling" and was ready to pay for it, was paroled today.

Mrs. Setze, who is 30 and a widow, came to Cleveland from New Orleans. She told at her trial, when she pleaded guilty to forgery, how she had spent her money taking men around to grill rooms accompanied by a special piano player and singer, and told the court she was ready to pay for her fling at last life.

## TO SIGN OR NOT TO SIGN

The Bills, That is the Question, Whether it Would Be Nobler.

To Veto Them and Get a Licking or Sign Them and Let the People Have What They Want.

By United Press Wire.

Chicago, Aug. 11.—Editors in every state have been heard from in the Tribune's poll to ascertain editorial sentiment as to the wool bill the farmers free list bill and the cotton bill. The editors were asked whether they thought the president should sign or veto the bills.

	Sign.	Veto.
Republican	161	405
Democratic	379	17
Independent	99	57

Totals 639 479. In the central and far west, the sentiment was overwhelmingly in favor of the president signing the bills. As soon, however, as the eastern states were heard from this majority was greatly reduced, eastern editors, especially Republicans, favoring a veto.

## No Place to Lay Their Heads.

Denver, Col., Aug. 11.—Delegates who arrived to attend the national negro educational congress literally had no place to lay their heads. There are but three small negro hotels in Denver. The other hotels refused to receive the negroes as guests. The negro population of Denver is small. As the result of its canvass the committee in charge secured accommodations for 300 guests. Over 1,000 delegates are expected, including Booker T. Washington.

The committee is today considering the erection of tents to house the delegates.

## Niven Catches On.

Columbus, O., Aug. 11.—W. R. Niven, former mayor of Bellefontaine, has been appointed a deputy inspector in the state bureau of accounting, by State Auditor Pullington. Niven is considered an expert in municipal accounting. He is a Democrat.

## THRONE OF PRIVILEGE

Shattered in the Seat of its Power, the English House of Lords.

## LESSER OF TWO EVILS

That is What the Veto Bill Was Considered by the Peers.

Money Bills to Become Law Without the Assent of the Upper House.

King Will Mix His Signature Next Week—Parliament to Adjourn on the 18th to Reassemble in October.

By United Press Wire.

London, Aug. 11.—Government by the people is a reality in England today. From every section of the empire long congratulatory telegrams poured in on Premier Asquith and his able lieutenants, who, by their absolute stand for the powers of the elected representatives over the hereditary peers, made possible the right of the responsible electors to plan and enforce its own fiscal legislation.

The house of commons, made up of members elected by the people and who will in the future be salaried officials, is to be the sole factor in making up the annual budget, deciding what shall not be taxed and running the British government. Heretofore, the house of lords had equal power with the commons in all legislation. Now it may, under the provisions of the bill passed last night by a vote of 131 to 114, merely assent to the operation of financial legislation for a brief period, but if the bill is repassed by the commons, it becomes a law regardless of the attitude of the upper chamber.

The amended law makes constitutional government a reality and perpetuates the Liberal control of British affairs for many years as the conservative organization is split in twain. Home rule for Ireland, increased old age pensions, equitable taxation, all of the measures advocated by David Lloyd-George, and the premier, has made it plain that King George is supporting the Liberals.

London, Aug. 11.—"With the passage of the veto bill in the house of lords last night, England stands at the door of a new political era in which Democracy is free, where the arrogant selfishness of caste is shattered and the feudal sword broken."

This is the opinion expressed today by radical leaders. The general sentiment of the Conservatives is that when the lords accepted the veto bill of 131 votes to 114, they accepted the lesser of two evils and temporarily putting up with a condition they expect speedily to change. They predict that the veto measure will finally be repudiated by the electorate.

The climax of the debate came when Viscount Morley declared: "Every vote against my motion not to insist on the amendments is a vote given in favor of a large and prompt elevation of peers."

The vote of the lords was declared in reality a vote to "protect Britain's aristocracy at the expense of its power."

The lords rather than open their "exclusive circles" to commoners gave in to the hands of the people the arbitrary powers which they exercised for hundreds of years.

The governing measure, as it now stands, provides that money bills shall become law without the assent of the lords.

The veto bill becomes a law when the king affixes his signature which he is expected to do next week. Parliament will adjourn August 18 to reassemble in October to complete the routine work of the session.

## SOMETHING REMARKABLE

An Electrical Storm Starts Thirty-six Fires at Freeport, Ill.

By United Press Wire.

Freeport, Ill., Aug. 11.—A severe electrical storm struck this city today starting thirty-six fires and throwing the city into a semi-panic. Many horses were cremated. No persons are reported injured. The property loss will be large. Wire service is demoralized.

A new talking machine has been invented by a man in Tacoma, which claims to make a record on a long film, such as is used upon the reels of moving picture machines. By its help the public may not only see as in the motion pictures—but hear entire operas and theatrical plays.

Five Drowned. Hope, B. C., Aug. 11.—The Fraser river, at Saddle Rock, is being dragged today for the bodies of five men who met death there late yesterday. The boat from which they were laying a cable was overturned by the current and all were drowned. Their names have not yet been learned.
